What is RoboCup Hackathon?

A national robotics hackathon by Balki Technologies for students in Grades 8–12. Pick a robot, build it live against the clock, and take on students from across India.

OUR AIM

A global, competitive mindset in AI and robotics, for every student in India.

How it works

1

Pick your robot

Choose 1 of 10 robots when you sign up.

2

Get the sealed kit

Every part you need, right to your door.

3

Build it live

Open, build and beat 3 tasks in one hour, on camera.

Skills you'll level up

- **Wire real circuits**
- **Play with sensors**
- **Tune real code**
- **Build against the clock**

FOR PARENTS & SCHOOLS

- **No travel, compete from home**
- **Every part in the box, nothing to buy**
- **Every build judged live on camera**

10 robots. Which one is yours?

Pick one when you sign up. Here are four of them. The other six? Top secret!

1 Line-Follower & Obstacle Bot
Follows a line on its own and steers around obstacles.

2 RC Bluetooth Smart Car
A speedy car you drive from your phone.

3 DIY Robotic Arm
A desktop arm that grips, lifts and stacks.

4 Gesture Controlled Robot
Tilt your hand and it follows your moves.

6 more robots... top secret!

REVEALED ON INSTAGRAM

5 Top-secret robot
Hint: it has a camera for an eye.

6 Top-secret robot
Hint: no goal gets past it.

7 Top-secret robot
Hint: red, green or black?

8 Top-secret robot
Hint: it's on a rescue mission.

9 Top-secret robot
Hint: two wheels, zero falls.

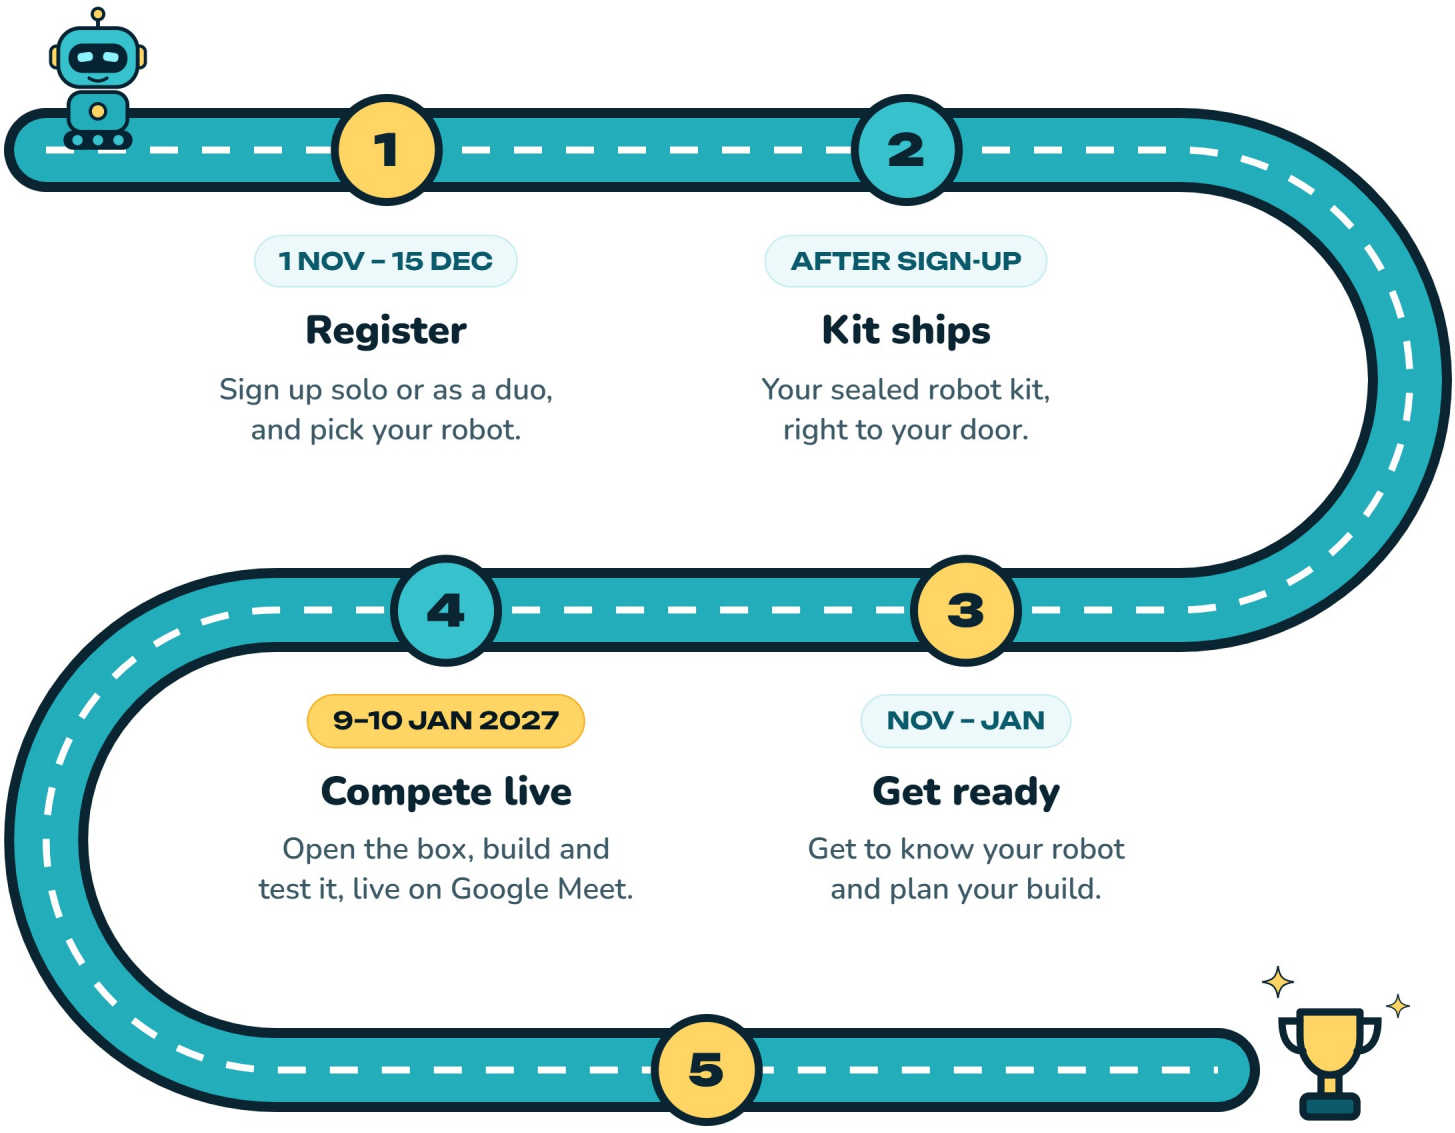

10 Top-secret robot
Hint: your phone is the remote.

Every robot faces 3 secret tasks, too.

Watch the reveals:

Your journey to the finals!

Five stops from sign-up to the big day. Ready, set, roll!

1 NOV – 15 DEC

1 Register

Sign up solo or as a duo, and pick your robot.

AFTER SIGN-UP

2 Kit ships

Your sealed robot kit, right to your door.

NOV – JAN

3 Get ready

Get to know your robot and plan your build.

9–10 JAN 2027

4 Compete live

Open the box, build and test it, live on Google Meet.

16–17 JAN 2027

5 Results

Winners announced!

See you at the finals!

Win big!

Every team takes something home.

1ST PLACE

₹10,000

cash + a drone kit

TOP 5 TEAMS

1-month mentorship

Grow your big idea with Balki's founder.

TOP 20 TEAMS

1-month R&D internship

Solve a top-secret, real-world problem with our R&D team.

EVERYONE

Participation certificate

Proof of your robotics skills.

Win or not, you go home with a robot you built yourself!

JUDGED BY INDUSTRY EXPERTS

Who are they? Top secret!

Industry-expert mentors judge every build live. Their names stay secret to keep it fair for everyone.

Ready to build?

Early-bird prices end 25 Nov 2026. Grab your spot!

SOLO — 1 student

~~₹2,500~~ regular price

₹1,800

EARLY-BIRD PRICE

DUO — Team of 2

~~₹3,000~~ regular price

₹2,500

EARLY-BIRD PRICE · PER TEAM

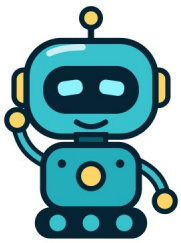

Every entry includes your robot kit (yours to keep!), a live slot and a certificate.

WHO CAN JOIN

- Students in Grades 8–12
- Solo, or a team of 2
- From any school in India
- Duo partners can be from different schools

Scan to register

Registration is open 1 Nov – 15 Dec 2026

Or tap here to register (Google Form)

Please note: All registrations are non-refundable. If you can't take part, you can transfer your pass to another student with prior approval from Balki Technologies.

@balki.technologies

The team behind RoboCup

Balki Technologies is a Hyderabad-based edtech company. We make affordable robotics and STEM kits for schools, aligned with NEP 2020 and ATL, for Grades 3–12.

BALKI TECHNOLOGIES

Recognised by #startupindia

Official supplier on GeM Government e Marketplace

What drives us

OUR VISION

To make world-class STEM education accessible to every Indian school child through affordable, progressive robotics kits aligned with NEP 2020 & ATL mandates.

OUR MISSION

Standardize STEM lab infrastructure across India's 50,000+ ATL Labs and private schools with a single, turnkey solution.

Meet our founder

> **My motivation is to give access to affordable robotics to all the students possible.**

Phanindra Balki

Founder, Balki Technologies

Bring Balki to your school

RoboCup is just the start. We help schools run hands-on STEM, robotics and AI learning all year round.

3–12	50–100	3 levels
grades covered	experiments per kit	Beginner → Pro

What we offer

ATL lab kits
Affordable kits aligned with NEP 2020 and ATL.

Robotics
Build, wire and program real robots.

AI & coding
From first lines of code to AI projects.

Drones & IoT
Fly, sense and connect smart devices.

STEM & maker labs
One turnkey lab for ATL and private schools.

Curriculum
A tiered path: Beginner → Intermediate → Pro.

Book a demo for your school

Call or email us, and we'll show you how it all works.
